

### 3. The Log Canoe

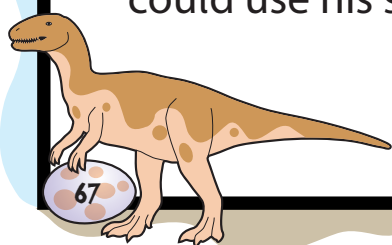

Axel threw a stick in the lake that he found on the shore. He noticed that the stick didn't sink, but floated on the water. "That stick could help us if it was big enough," thought Axel. He looked at the trees around the lake and had an idea. He asked Dad to chop down a tree that was just the right size. When they had taken off the branches, they put the trunk in the lake.

Axel cheered when he saw that it floated. He had made a canoe. He got two branches to make oars. Now he could paddle the canoe.

Axel and Dad sat on the log canoe. Dad cheered when he saw that it floated.

If Axel could paddle the canoe into the middle of the lake, Dad could use his spear to catch the fish.
